Response to Arguments

1. Applicant's arguments filed with respect to amended claims 20-23, 10/14/05 have been fully considered but they are not persuasive.

The 101 rejection against claim 20, in view of being amended is dropped in view of amending the claim to include an apparatus employs the management information to access the stream data.

{A} In re page 7 applicant states, "All sector addresses in Fig. 5 relate to I pictures." And, "Thus all times codes in Fig. 2 do not relate to I pictures".

In response applicant has not proven this to be true by merely stating this is the case, wherein the table of Fig. 5 does, while Fig. 2 does not, the examiner deems all tables do, which relate to the trick operations of Fig. 11,

- wherein when $M = N$, no matter what table is used all I pictures are reproduced, in view of,
- wherein when $M < N$, then I pictures are reproduced skipping-ly, while when compared to $M = N$, it is deemed based on this comparison, all are identified and used.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim

Art Unit: 2616

that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lenihan et al. (US 6,169,843) in view of Hirabayashi et al. (US 6,002,834).

The examiner incorporates the last action against the claims, wherein as amended including the limitation of wherein the management data includes all the access pointed correspond to I pictures of MPEG, met by Hirabayashi Fig. 2, in reference to Fig. 11, to perform trick play with I frames ONLY, wherein in accord to $M < N$, some I frames are skipped, as is clear to the examiner, therefore, any table can be used which all identify all I frames to perform wherein $M = N$ all I frames are used, while when $M < N$, I frames are skipped.

Col. 5, lines 60-, when $M = N$ only the I picture is retrieved by the trick play table ...

Therefore, any table used all I pictures are used, but, when $M < N$, I pictures are skipped with respect to any table again, as is clear in the comparison when I pictures are skipped, while when $M = N$, there is no skipping, as clearly indicated by Fig. 11.
